EXPERIENCE

Delivery Rider Apr 2021 - Mar 2022
Shopee | Brgy. Paciano, Calamba City, Laguna

- Delivery and logistics operations
- Courier and parcel delivery services
- Last-mille e-commerce delivery

Web Developer Feb 2025 - Present
Freelance

- Worked as a freelance web developer providing website design, development, maintenance, and troubleshooting services for various clients. Built responsive websites, developed front-end and back-end features, integrated databases and APIs, fixed bugs, improved site performance, and coordinated directly with clients regarding project requirements, revisions, and deployment.

OJT Programmer Sep 2025 - Feb 2026
City College of Calamba | Calamba City, Laguna

- Developed e-Docs, a PHP/MySQL document management system for institutional research, extension, planning, and QA workflows.
- Integrated AI decision support and analytics insights for document and institutional data review.
- Built e-Formatter, a React/TypeScript tool for automated research paper formatting using XML manipulation.

SELECTED PROJECT(S)

Applicant Management with Decision Support System and Data Analytics Feature for Staff Search Asia Service Cooperative
PHP, CSS, JS, MYSQL

- Developed a web-based Applicant Management System for Staff Search Asia Service Cooperative to automate and optimize the recruitment process. The system integrates a Decision Support System (DSS) to recommend job placements and a Data Analytics feature for automated reporting and performance insights. It centralizes applicant records, digitizes document submissions, and tracks application statuses, reducing manual errors and improving operational efficiency. The platform was implemented using the Agile SDLC model and evaluated with the ISO 25010 software quality model, achieving high scores for functionality, reliability, efficiency, and security. The system significantly reduced HR processing time and enhanced data-driven hiring decisions
